

HEARTLAND

7 Things You Get with an H2A Partnership

Warehouses now need to modernize operations to keep up with rising shipping demands and labor shortages. Modernization can help employees achieve tasks faster and eliminate downtime that is spent fixing devices. This boosts warehouse operations to increase productivity and reduce costs.

Honeywell

Reap the benefits of the Heartland/Honeywell Advantage

1 Reduce repair costs by 25% with AlwaysOn

Cutting down the amount of times devices need to be repaired reduces downtime so your cold chain workers can focus on important tasks.

2 Customize your network with AlwaysConnected

Flexible and reliable connectivity helps cold chain workers effectively communicate to gain valuable asset information.

3 Integrate multiple OEMs without straining your IT team

Seamless communication and integration of multiple OEMs helps improve flexibility without making workflows confusing.

4 Simplify onboarding with Android OS on Honeywell's user-friendly devices

Giving your warehouse employees access to a device that is familiar to them reduces training times and expenses.

5 Upgrade only what you need

Flexible, ongoing upgrades help you maintain devices at your own pace.

6 Manage new and current devices through one intuitive dashboard

Empowering your warehouse with a unified experience helps employee's complete important tasks

7 Simplify deployment with assisted training and rollouts

Faster and easier deployment of your devices facilitates development, certification, setup, and training in your cold chain

HEARTLAND 

Simplify warehouse modernization with Heartland and Honeywell.

- Optimize security, performance, and durability with Honeywell's computers
