

## You wouldn't tolerate dropped signals on your personal devices.

Expect the same undisrupted performance from your enterprise network with **AlwaysConnected.**

**You have the best hardware and software,** but without reliable connectivity, even the most optimized systems falter. That's why Heartland's authorized technicians work alongside you to eradicate:

Dead zones

Dropping signals

Overlapping signals and interference

Stalled operations

Recurrent IT interruptions

### REAP THE BENEFITS OF AN **AlwaysConnected Solution.**

- 5% to 10% productivity boost
- Optimized network performance
- Less IT expenses
- Quick network restoration
- Scalable coverage
- Wall-to-wall connectivity even in challenging environments
- Predicted disruption for less surprise downtime

### ADD A LAYER DEPENDABILITY

with the Heartland/Honeywell Advantage for:

Easier integration of enterprise mobile devices

Real-time visibility available through a touchscreen interface

Seamless communication between varying OEMs

Accelerated rollouts for quicker deployment and optimization

**BOOST  
WORKFLOW  
PRODUCTIVITY  
BY UP TO  
10%**

with facilitated network installation and maintenance, all through Heartland's **AlwaysConnected** wireless service.

1

## **Network Design & Engineering**

We take time in assessing your space to create a wireless network that adapts to your operations, ensuring scalable coverage, maximized roaming capabilities, and adequate capacity to support all your devices around the clock.

2

## **Site Surveys**

By carefully investigating your environment in person, we offer a detailed analysis and diagnosis of your space to create a wireless solution with adjustable settings and maximized roaming performance.

3

## **Structured Cabling & Installation**

Seamless cabling and installation helps get your solution running faster and smoother. Plan out your installation process with management services that encompass optical fa variety of wireless based distribution systems.

4

## **Network Monitoring**

Track network performance through a user-friendly dashboard to pinpoint possible outages and disruptions before they occur. Data can later be used to project strains in the network and facilitate quick adjustments and optimization.

5

## **Post-Installation Validation**

We validate final solution design through a careful process to ensure long-term usability based on the pre-established goals you set at the beginning of your project.

6

## **Network Diagnostics**

Keep counting on dependable visibility and productivity with a support team for any eventual diagnostics. Restore network operations quickly to prevent downtime and ensure operations run smoothly.

## **CHOOSE A CONNECTIVITY SERVICE**

designed for maximized performance anywhere you need it. Contact us today for a preliminary assessment of your site to get started.
